Tue		All dates subject to the sighting of the moon, information based on data from the H.M. Nautical Almanac Office and the Royal Greenwich Observatory.																					
Wed																							
Thu																							
Fri																							
Sat		Qamar Dar Akrab - According to narrations we should refrain from reciting the Nikah during Qamar Dar Akrab when the moon is passing through the phase of Scorpio.																					
Sun																							
Mon																							
Tue																							
Wed		Islamic Dates for 2023																					
Thu																							
Fri																							
Sat																							
		Regional Variations - The Islamic dates are based on expectation of crescent sighting in Europe calculated from the latest available scientific data. During 1443/44 A.H., regional variations may occur for some months. To fulfil the Shariah requirements we will continue to ascertain that the actual sighting has occurred on the days expected.																					
		Visible Crescent - One should not confuse the New Moon with the visible thin crescent. It should be realised that the new crescent following a lunar month of 30 days will be brighter and stay longer in the sky than the crescent following a month of 29 days.
