 25 September 2025  
 24 October 2025  
 23 November 2025

**Visible Crescent**  
 One should not confuse the New Moon with the visible thin crescent. It should be realised that the new crescent following a lunar month of 30 days will be brighter and stay longer in the sky than the crescent following a month of 29 days.

**New Moon**  
 The New Moon phase is defined to be the moment when the moon is almost directly between the Earth and the Sun. At this moment the moon's dark surface faces the Earth. The New Moon is completely invisible. The date and time of this invisible New Moon is commonly found in almanacs, newspapers and calendars.

			31			29	

**First Crescent -**  
The Islamic month begins with the visible First Crescent and not with the invisible New Moon. The First Crescent is usually sighted in the western sky just after sunset on the first or second evening after the New Moon phase. The sighting depends upon the altitude of the crescent above the horizon, time difference between sunset and moonset and the angular distance between the sun and the moon.

**PLEASE NOTE:**  
\*4th Rabi al-Awwal: Mu'mineen should note of the 3 reported wafat dates, 2 other dates are 10th (popular) or 12th Rabi al-Akhar (less popular).  
They are advised to consult with local centers as to what works better for them to avoid overlap with wiladat date.  
\*\*10th Rabi al-Akhar: Mu'mineen should note of the 4 reported wiladat dates, 2 popular ones are 8th or 10th Rabi al-Akhar.

They are advised to consult with local centers as to what works better for them to avoid overlap with wafat date.
