	New Moon - The New Moon phase is defined to be the moment when the moon is almost at the horizon. East and the Sun. At this moment the moon's dark surface faces the Earth. The New Moon is completely invisible. The date and time of this invisible New Moon is commonly found in almanacs, newspapers and calendars.		29			15	26		13	31		18	28		17	26	Waqt of Sayyida Zaynab (a) 62 AH						15
	Fifth Month - The Islamic month begins with the visible First Crescent and not with the invisible New Moon. The First Crescent is usually sighted in the western sky just after sunset on the first or second evening after the New Moon phase. The sighting depends upon the altitude of the crescent above the horizon, time difference between sunset and moonset and the angular distance between the sun and the moon.		30			16	27	Beginning of the uprising of al-Mukhtār b.
