03 October 2027
01 November 2027
01 December 2027

Regional Variations -

The Islamic dates are based on expectation of crescent sighting in Europe calculated from the latest available scientific data. During 1446/47 A.H. regional variations may occur for some months. To fulfil the Shari'a requirements we will continue to ascertain that the actual sighting has occurred on the days expected.

Visible Crescent -

One should not confuse the New Moon with the visible thin crescent. It should be realised that the new crescent following a lunar month of 30 days will be brighter and stay longer in the sky than the crescent following a month of 29 days.
